

A close-up photograph of a young Black couple embracing outdoors. The woman, with curly hair, is leaning over the man, who is smiling broadly with his eyes closed. They are both wearing light-colored clothing. The background is a soft-focus green landscape with sunlight filtering through the trees.

HIV Self Test

Safe, convenient  
and accurate

# Know your HIV Status in Minutes

The Atomo HIV Self Test is discreet, accurate, and easy-to-use. You can perform the test yourself in the privacy of your own home or wherever you feel comfortable. You will be able to read your result in just 15 minutes.

**Small Blood Sample**  
Atomo HIV Self Test needs only a small drop of blood from your fingertip.

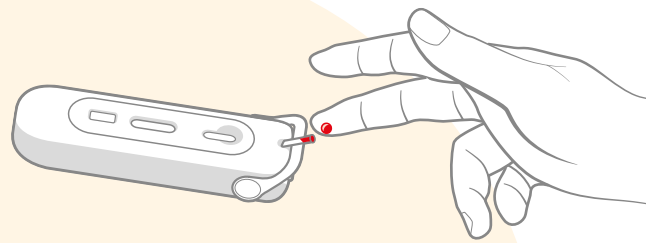

**Smart Design**  
Its all-in-one design makes testing simpler, safer and more convenient

**Accurate Result**  
Proven to be 99.7% accurate, the test gives a result in just 15 minutes.

Sensitivity  
**99.7%\***

Specificity  
**99.7%\***

\*Data on file

Atomo HIV Self Test is a very accurate, single use screening test for HIV, but a positive result will still need to be confirmed by your healthcare provider. Because the test detects HIV antibodies, it may not identify a very recent HIV infection. If you think you have been exposed to HIV within the last 3 months, you should consult your healthcare provider immediately. For more information on Atomo HIV Self Test, and to watch a training video, visit [www.atomohivtest.com](http://www.atomohivtest.com)

## Award Winning Design

Atomo rapid diagnostic tests have been recognised internationally for innovative design, performance and ease-of-use.
